Store at 15-30°C before use

Transport within 24 hours at 2-8 °C

For long term storage freeze at -20 °C

(The shelf life at room temperature is
12 months)

Composition

The HiViral™ Transport medium from HiMedia is a specially formulated medium for collection, transport and long term freeze storage of viruses - designed to maintain the optimum viability and virulence of the viral sample.

- ✓ HiViral™ is based on Hanks 'Balanced Salt Solution and also contains:
- ✓ a protective protein,
- ✓ antibiotics to prevent contamination
- ✓ buffers to control the pH
- ✓ Phenol red is used as a pH indicator
- ✓ and a cryoprotectant which helps in preserving the viruses, if specimens are frozen for prolonged storage
